---

- Improvements in transportation;
- Freedom of trade;
- Improvements of communications;
- Labour availability and skills.

## Effect of Globalization on...

Percentage Saying "Better" or "Worse"

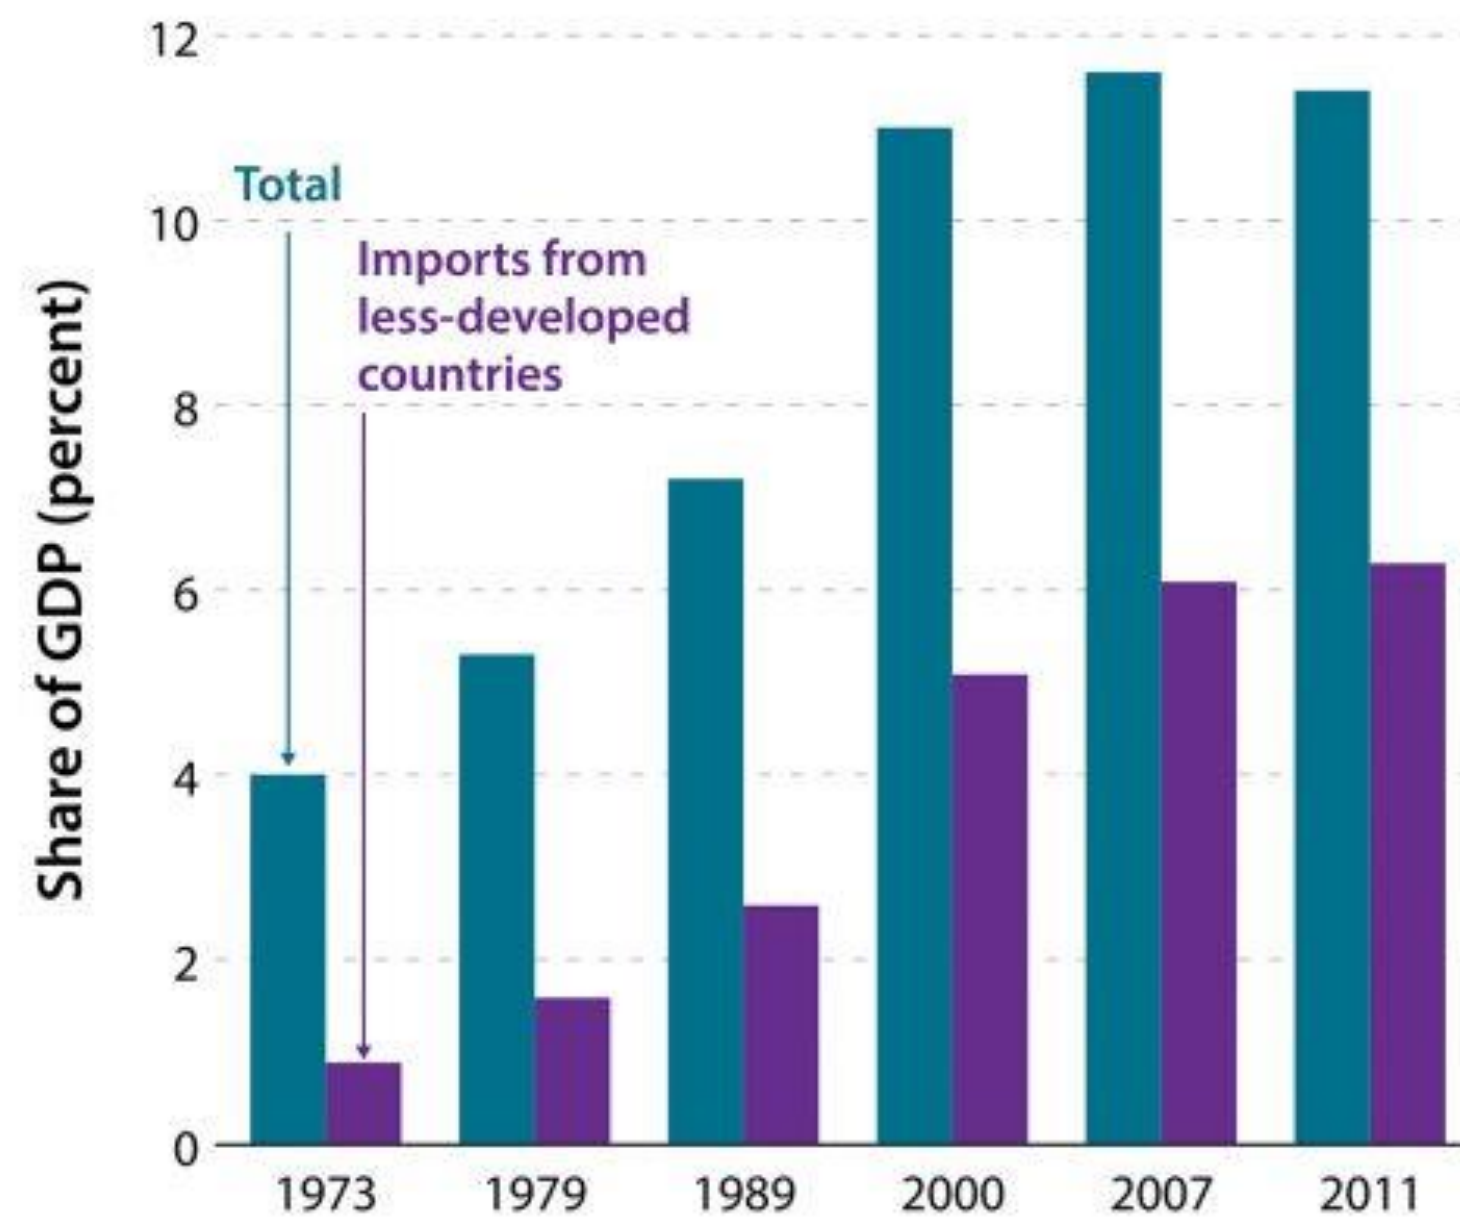

Average of 25 Countries Surveyed, (n=25,000)

# HOW DOES TECHNOLOGY AFFECT GLOBALISATION?

Globalization and technological change affect low-wage workers.

U.S. Manufacturing Imports, 1973–2011

Source: Bivens (2013).

U.S. Manufacturing Output and Employment, 1973–2016

Source: Bureau of Economic Analysis (1973–2016); Current Employment Statistics, BLS (1973–2016).

Note: Manufacturing output is gross real manufacturing output, deflated by Haver Analytics for years prior to 1997.

# Taxonomy of the globalisation of technology

Categories	Actors	Forms
International <i>exploitation</i> of nationally produced innovations	Profit-seeking firms and individuals	<ul style="list-style-type: none"> <li>● Exports of innovative goods.</li> <li>● Sale of licences and patents.</li> <li>● Foreign production of innovative goods internally generated.</li> </ul>
Global <i>generation</i> of innovations	Multinational firms	<ul style="list-style-type: none"> <li>● R&amp;D and innovative activities both in the home and the host countries.</li> <li>● Acquisitions of existing R&amp;D laboratories or greenfield R&amp;D investment in host countries.</li> </ul>
Global techno-scientific <i>collaborations</i>	Universities and public research centers	<ul style="list-style-type: none"> <li>● Joint scientific projects and R&amp;D networks.</li> <li>● Scientific exchanges, sabbatical years.</li> <li>● International flows of students.</li> </ul>
	National and multinational firms	<ul style="list-style-type: none"> <li>● Joint ventures for specific innovative projects.</li> <li>● Productive agreements with exchange of technical information and/or equipment.</li> </ul>

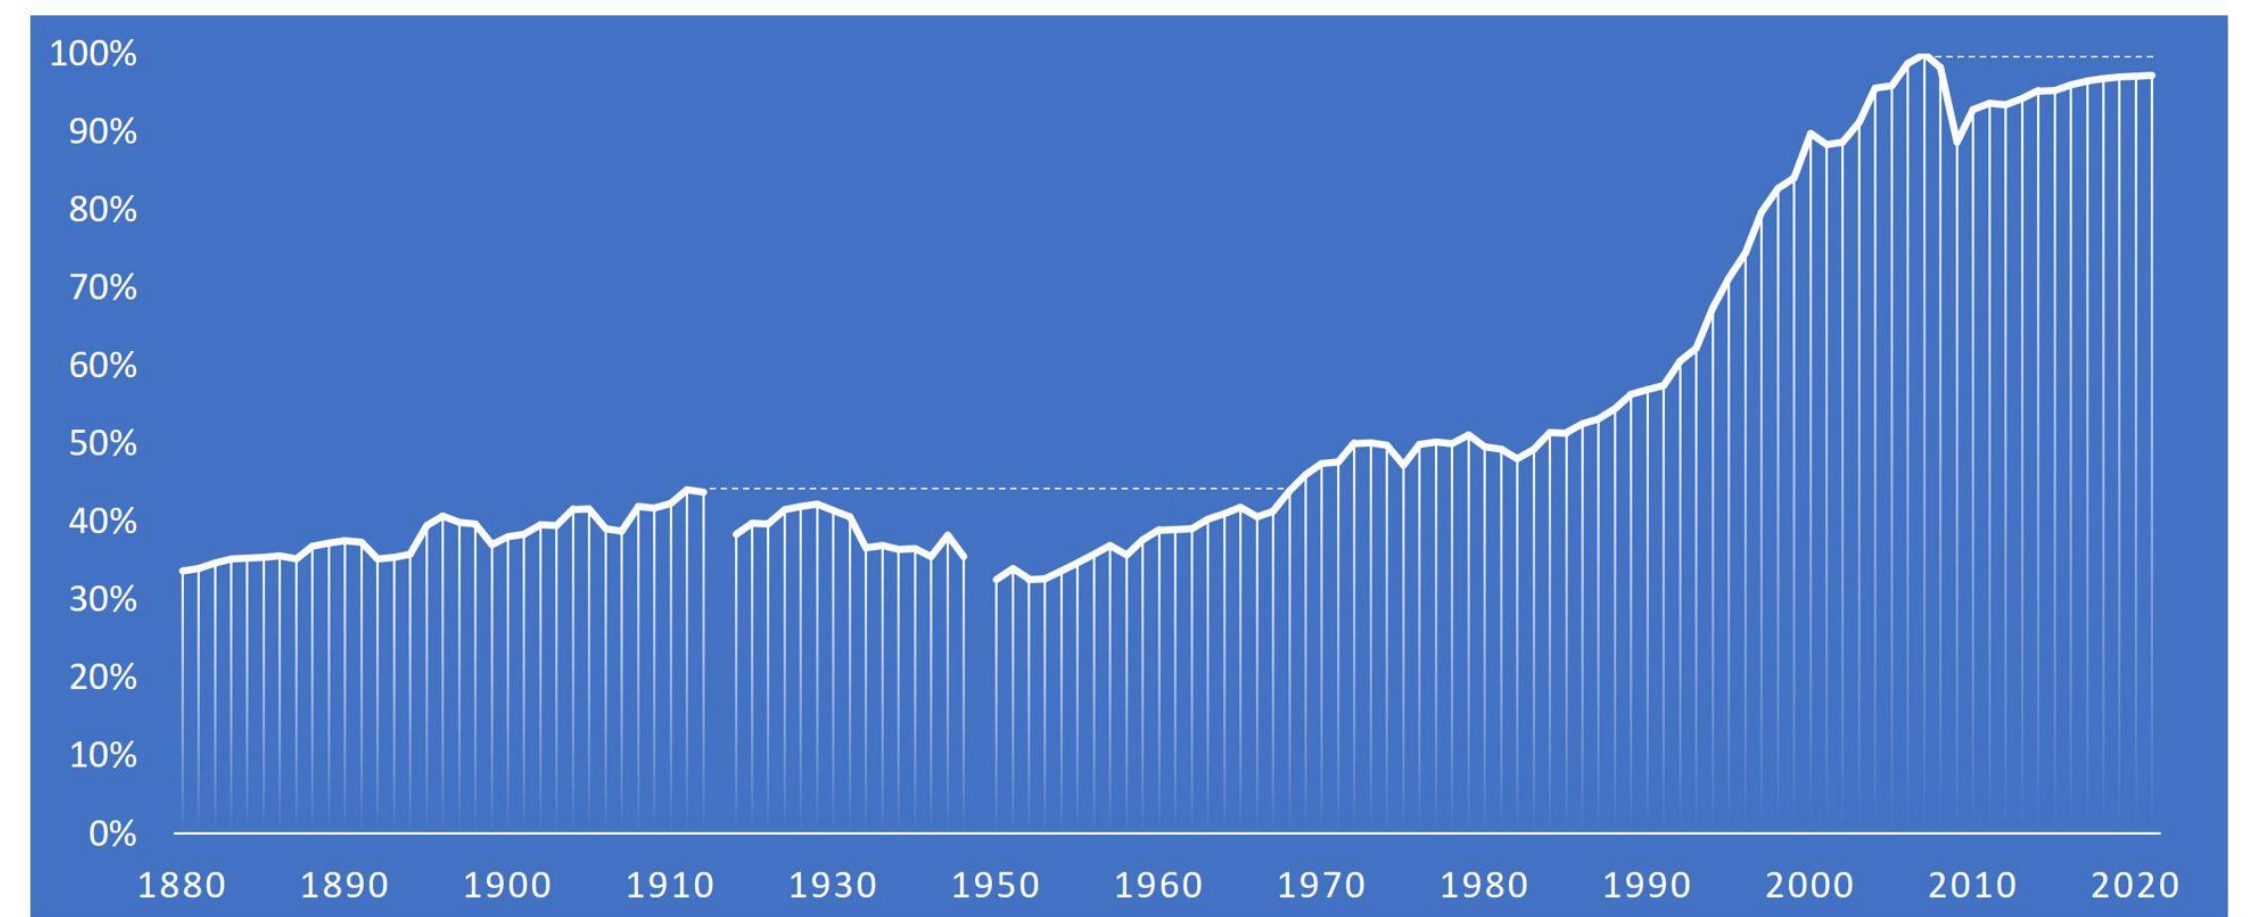

# TRENDS AND CHANGES IN THE TOPIC DUE TO GLOBALISATION

1. Aerial transportation
2. Open source
3. Bigger companies

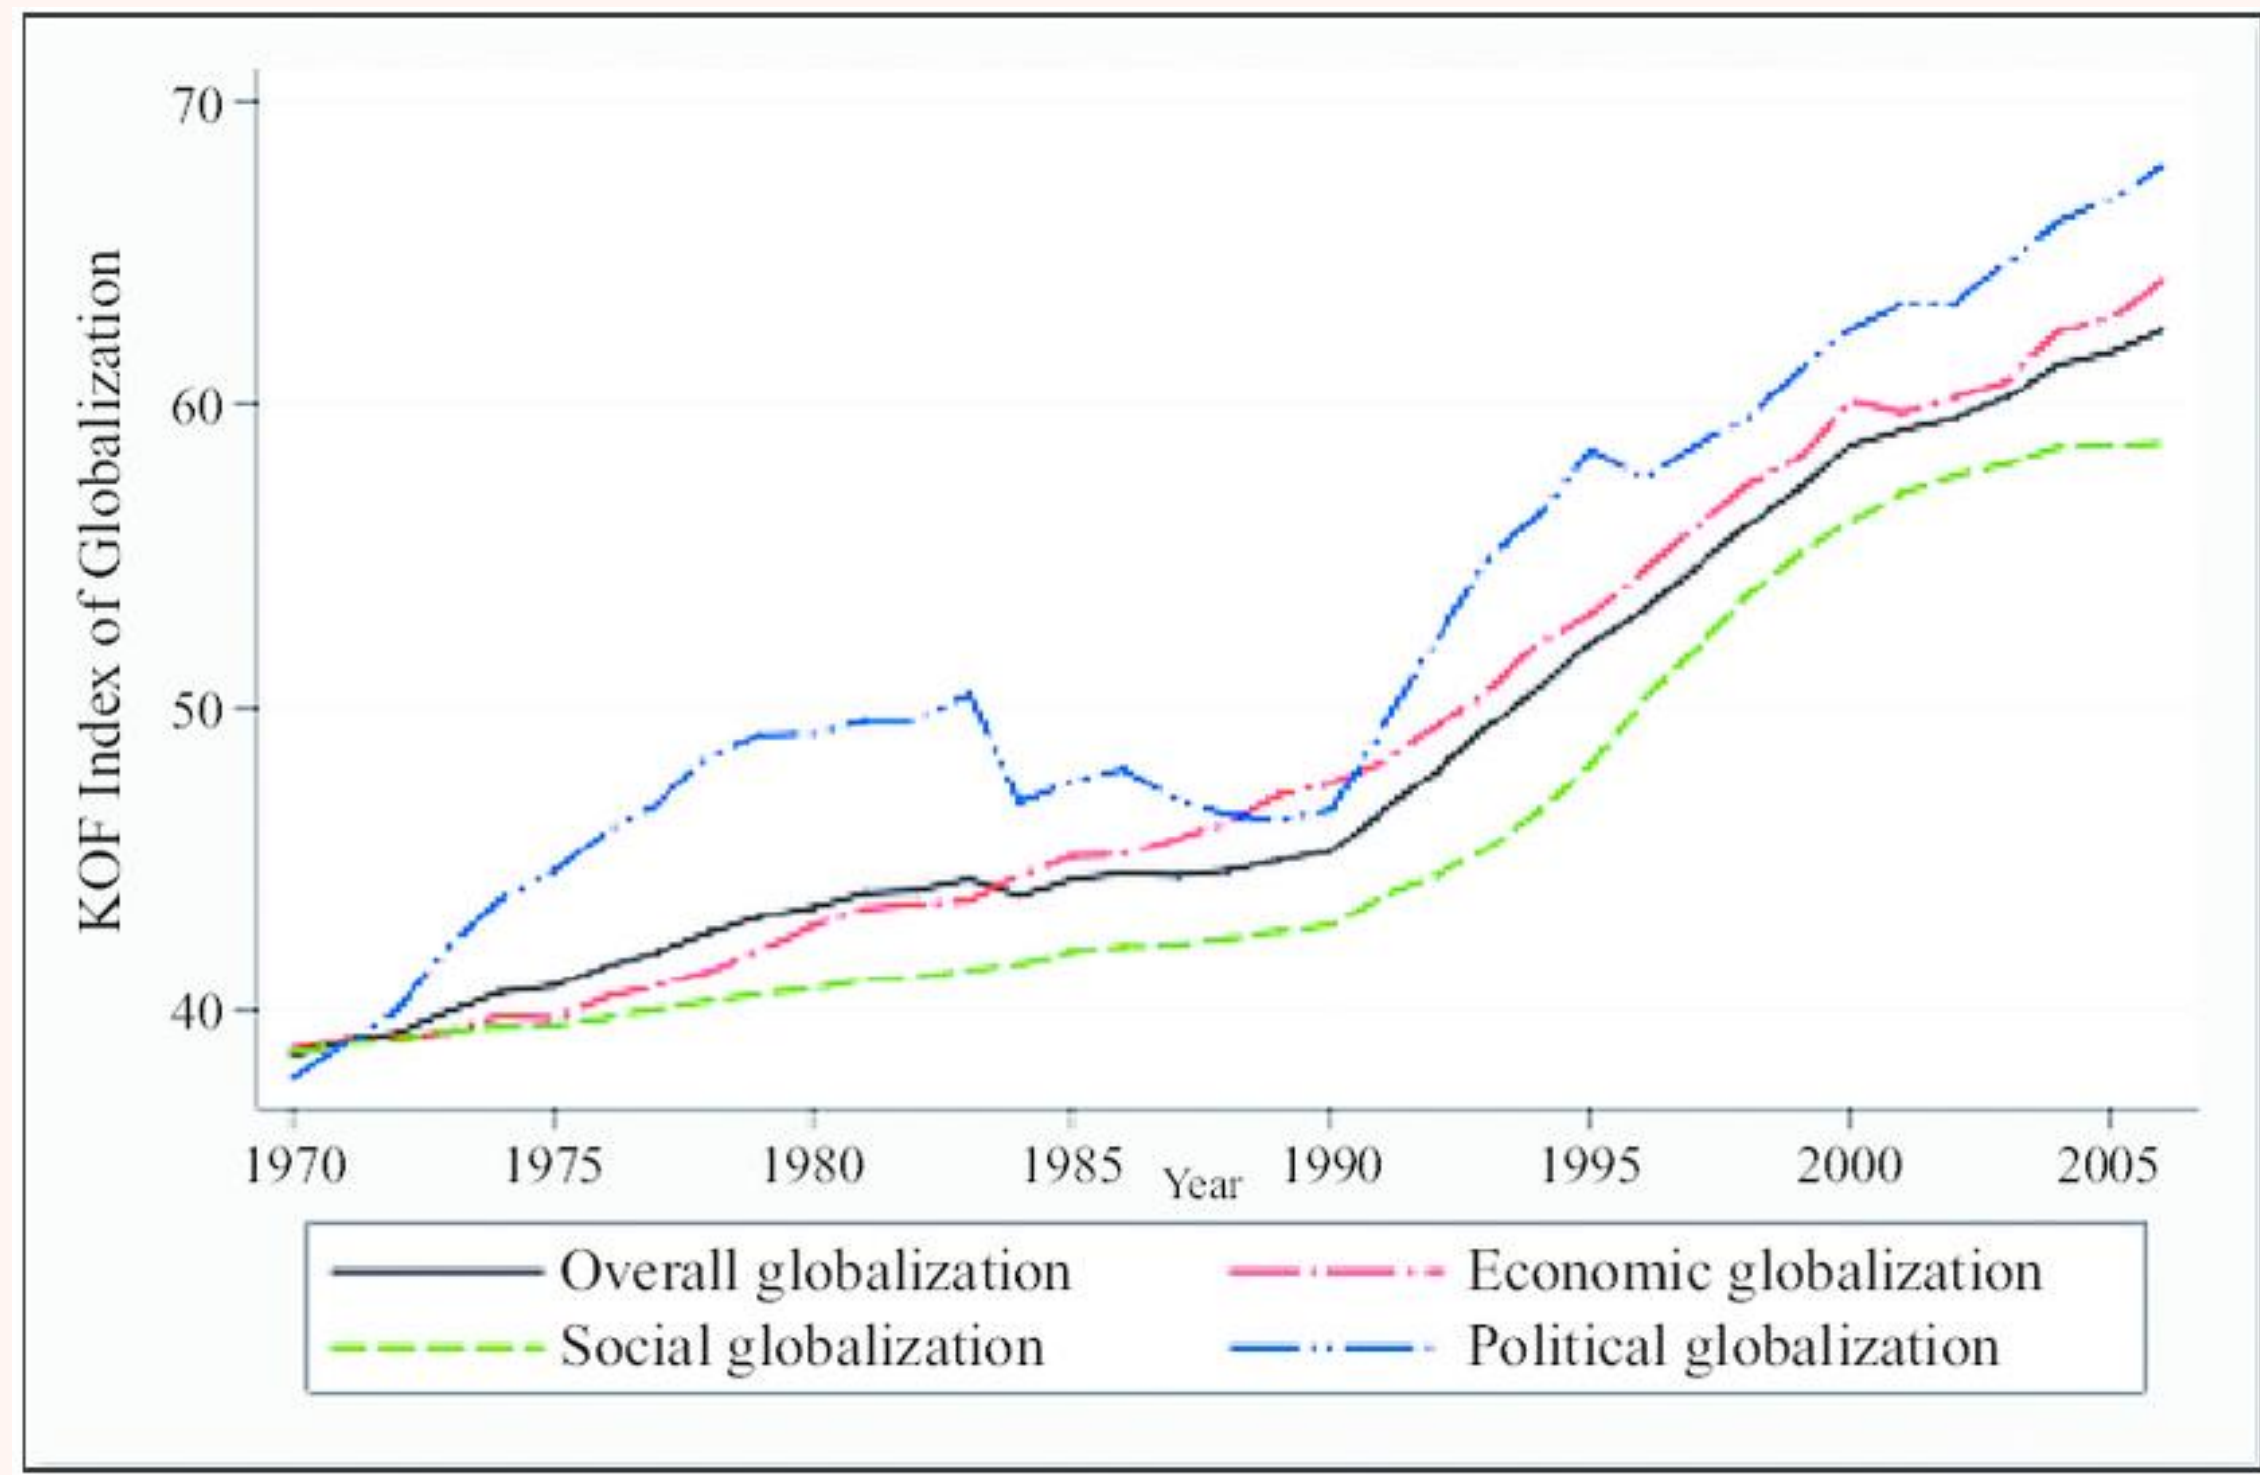

Globalization and Deglobalization 1880-2022  
(Openness of the world economy index numbers 2008=100)

- 4. Trends and vogue;
- 5. A mix of technologies;
- 6. Worldwide market;
- 7. More discoveries;
- 8. Everything is connected;
- 9. Social.

# CAUSES AND EFFECTS OF THESE TRENDS

TRENDS IN GLOBALISATION: INDIA

# RISKS OF GLOBALISATION REGARDING TECHNOLOGY

**Knowledge and expertise: develop and transfer technologies from the home market.**

## Countries filing the most patent applications Number of applications in 2013

Source: World Intellectual Property Organization (WIPO)

# RISKS OF GLOBALISATION REGARDING TECHNOLOGY

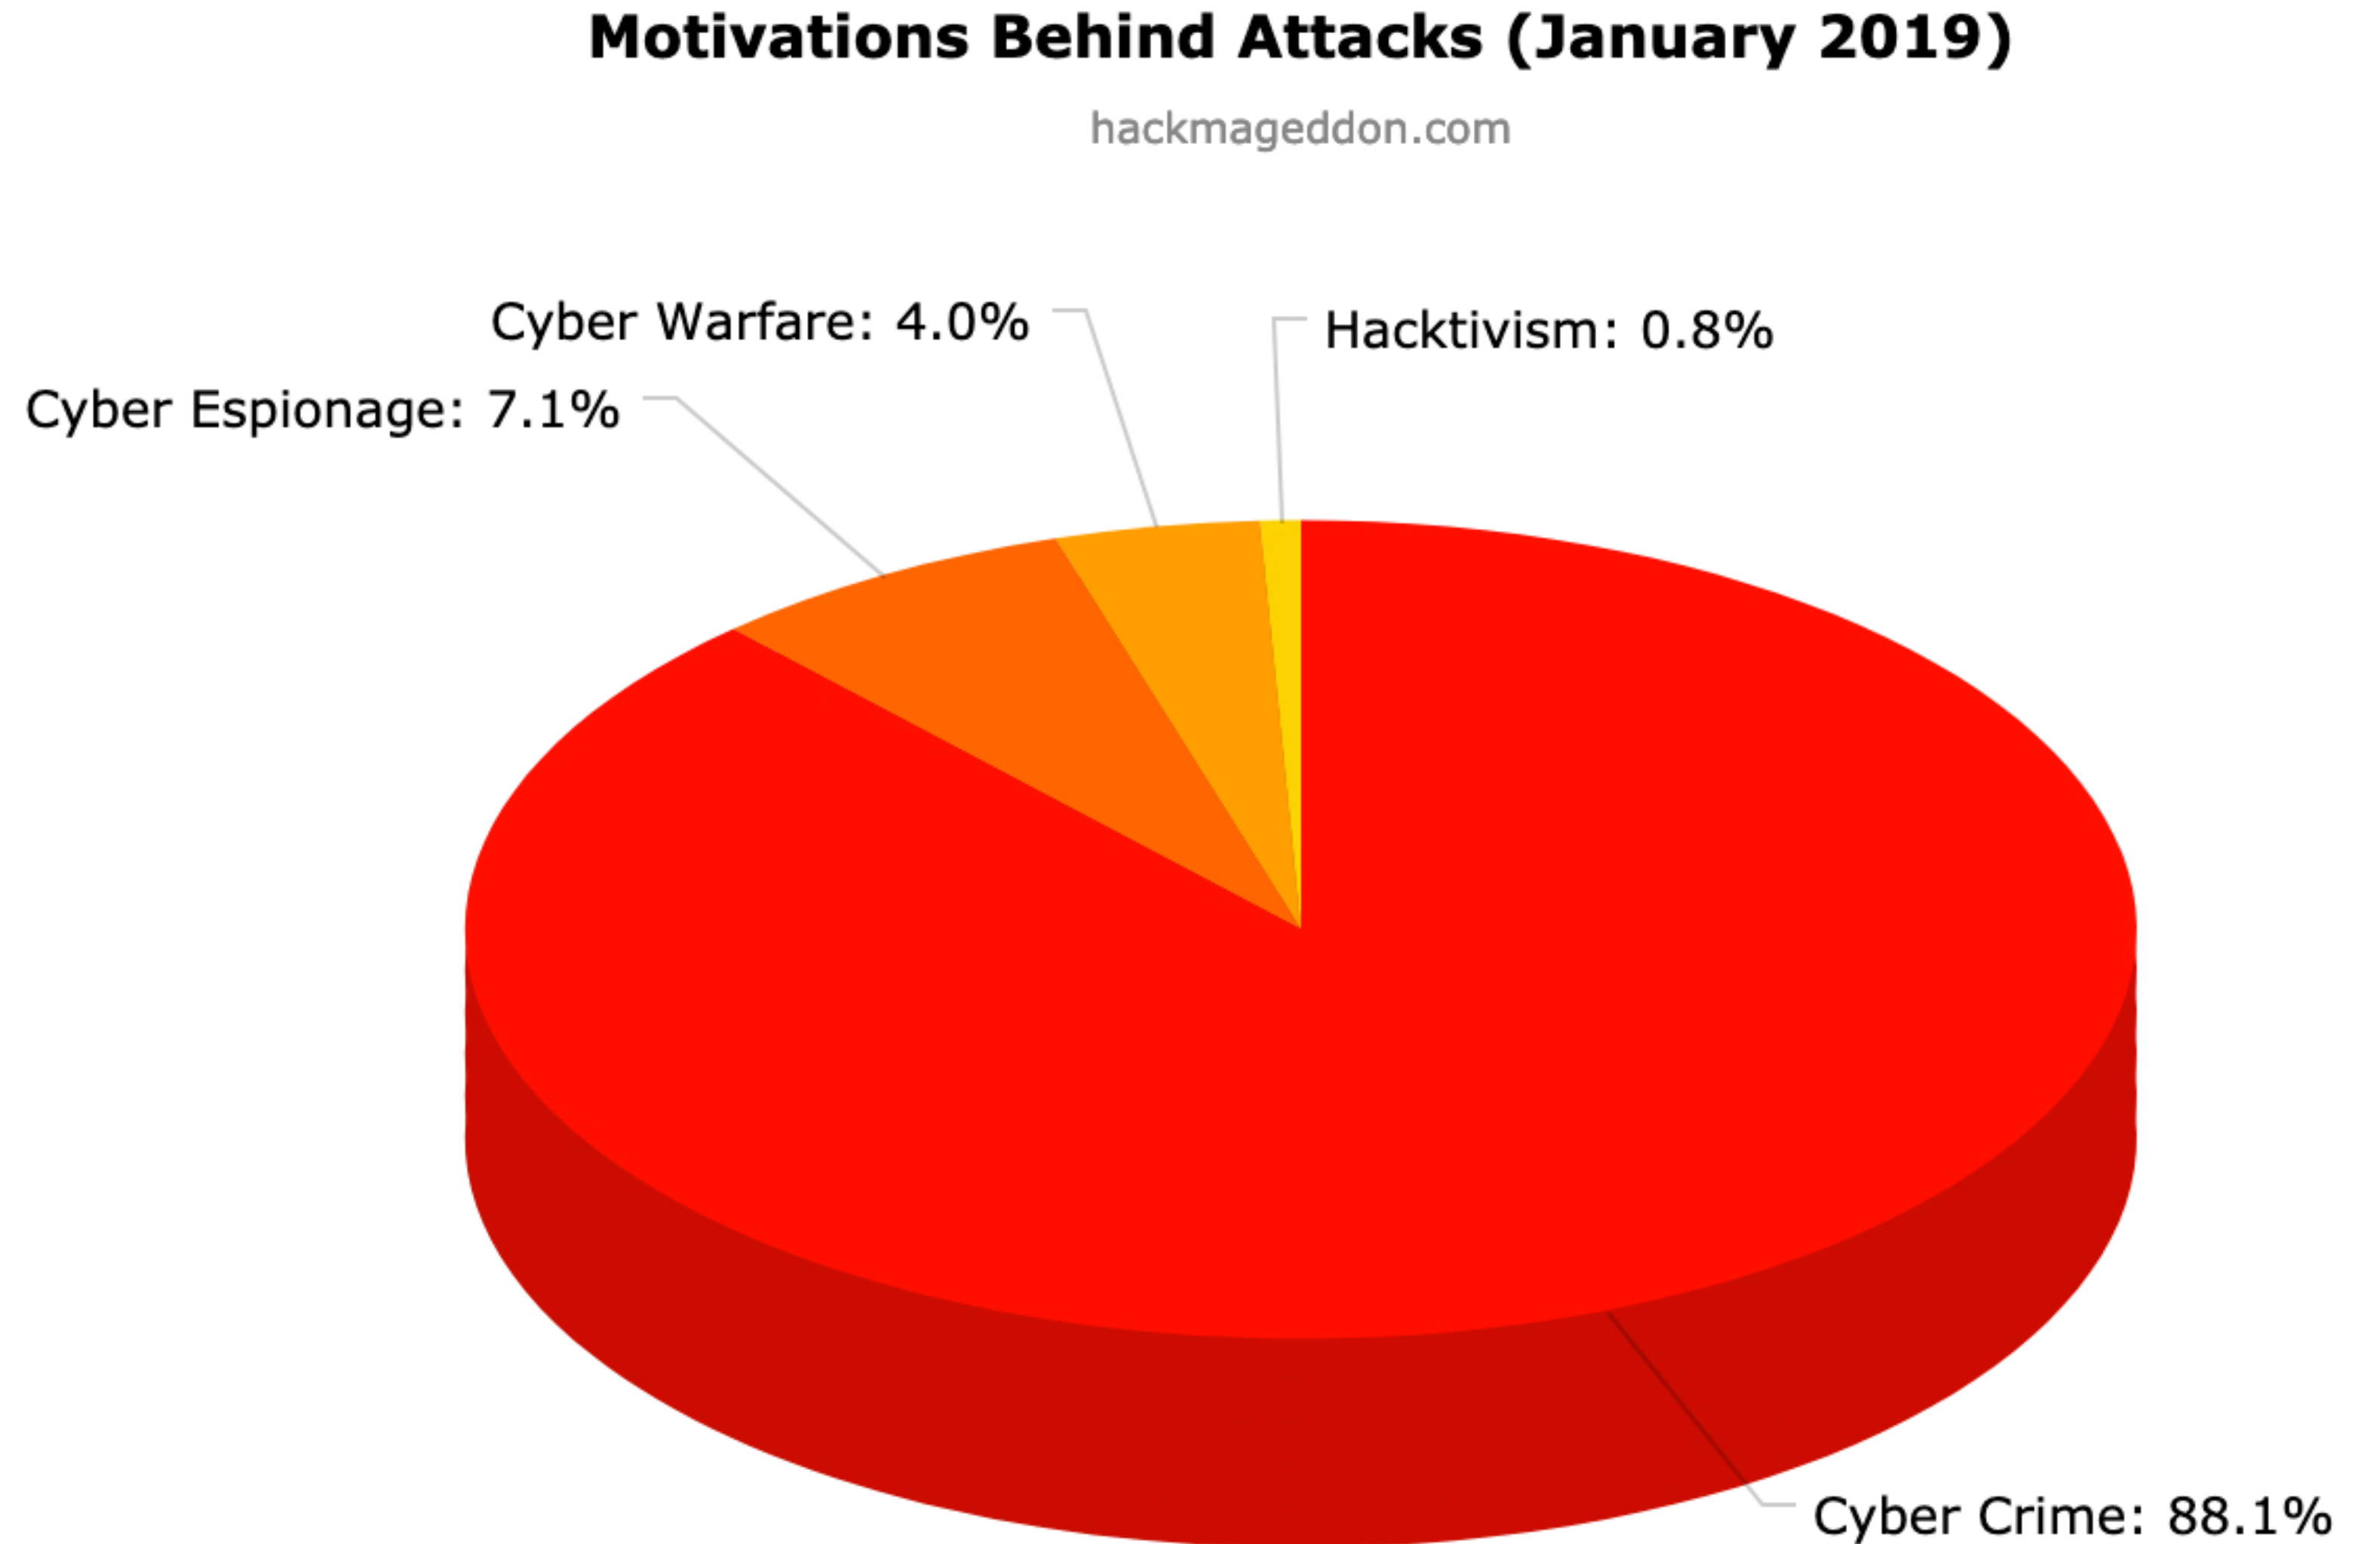

Hardware & Software components developed and built in different countries.

# RISKS OF GLOBALISATION REGARDING TECHNOLOGY

**Security: cyberattacks,  
privacy protection.**

---

# OPPORTUNITIES OFFERED BY GLOBALISATION RAGARDING THE TOPIC:

I.	Erasmus
II.	More job opportunities
III.	More countries to visit
IV.	Communication
V.	Technological alliances with other countries
VI.	Worldwide art
VII.	Worldwide films and cartoons
VIII.	More wealth
IX.	Safety

---

# Globalisation

## Winners

- Economies with low-labour cost and infrastructure to export.
- New middle class in developing and emerging economies.
- Exporters with competitive advantage.
- Workers who gain jobs in export industries.
- Educated and skilled workers who have power to gain higher wages
- Multinationals who benefit from tax avoidance and outsourcing.
- Workers who are able to move to higher-income economies

## Losers

- Manufacturing sector in high labour cost countries
- Regions e.g. 'rust belt' which have seen a decline in employment.
- Structural unemployment amongst former manual workers.
- Poorest 5% who have seen stagnant incomes
- Environmental costs of increased output, trade and growth.
- Land-locked countries unable to develop exporting industries.
- Economic and social pressures from migration.

# CONCLUSIONS

- Technological development has helped increased globalization.
- The Internet /World Wide Web has been the biggest thing to come out of Information Technology advancements.
- Technology like the Internet has given rise to E-commerce. That has brought about new dynamics to the globalization of businesses.
- Technological globalization made a revolution in the financial sector, where diffusion of information based on technology has made possible people around the world to trade 24/7.
- Technology has also impacted on cultural globalization with inventions like telephone and television.
- Communication technology has brought the world closer and people closer regardless of where they are in the world.
