

HOW TO REDUCE POLLUTION

Alessandro Greco & Kayla Soldati

NO MORE SMOG BY CARS

Limiting the use of the cars :

- Conferences could be held whenever possible to avoid the spread of smog
- To reduce the average of family cars from 2/3 to one (unless necessary)

ELECTRIC CARS

- Another idea to reduce the amount of pollution could be the exclusive use of electric cars:
- Reduce the sale of petrol cars from trade from 100%, 50%, 30% until it no longer exists on the market
- This project will have to be completed in 6/9 years

THE ROLE OF THE GOVERNMENT

- Until the realization of the precedent project, two days a month it will not be allowed to use petrol cars
- Better organization by the government (more fines)

A GREENER WORLD

- The government should make available more garbage bin around the city, so people won't throw rubbish on the ground
- Extend obligatory separate collection to everyone

ELECTRIC PUBLIC TRANSPORT

- Using the same process of the electric cars, the entire world should increase the number of electric transports (trains, busses, underground...)
