

HOW CAN WE SAVE OUR PLANET?  
CHOOSE ONE FOR OUR FUTURE...

# WE CAN DO A LOT OF THINGS TO SOLVE THE PROBLEM...

- Creating less waste by using less plastic and trying to recycle what we consume.
- One of the best ways to reduce pollution is the separate collection, that is a waste management.
- With this management we can do recycling —> CLEANER ENVIRONMENT AND A BETTER LIFE

## RECYCLE

CLOSE THE LOOP  
AND REMAKE

## REFUSE

DON'T CONSUME  
WHAT YOU  
DON'T NEED TO

## REDUCE

REDUCE  
CONSUMPTION  
OF ENERGY  
AND MATERIALS

## RETHINK

BE MINDFUL OF YOUR CONSUMPTION, YOUR RELATIONSHIP WITH "THINGS" AND  
YOUR RELATIONSHIP WITH THE EARTH

## RE-USE

SHARE  
WITH OTHERS  
FIND NEW USES  
FOR OLD OBJECTS

## REPAIR

FIX OR UPGRADE  
YOUR OBJECTS  
RATHER THAN  
THROWING  
THEM AWAY

## RE-GIFT

SHARE,  
AND BE A PART  
OF  
THE GIFT ECONOMY

## RECOVER

ENERGY AND  
MATERIALS  
RECOVERY.  
AND UPCYCLE!

- Introducing in our society only electric cars —> GASOLINE (COMPOSED BY SOME HARMFUL GASSES) WON'T BE RELEASED IN THE AIR.
- nowadays, in time of corona virus, we are noticing this improvement because no one is using cars.
- The benefit we can obtain is an —> OZONE HOLE REDUCTION (LESS CO<sub>2</sub>).

- Reducing the waste of water and electricity
- Use more alternative energies such as gas and oil or with the installation of solar and photovoltaic panels or use the energy obtained from the wind turbines —> GREEN ENERGY THAT DON'T PRODUCE POLLUTION

-Wind energy (very clean energy) in recent years had a large growth due to the increases in greenhouse of gas emissions from fossil fuels, which are causing global warming

# THE SUSTAINABLE DEVELOPMENT AGENDA 2030
