

How to make Rome a better place

“Progress is impossible without change, and those who cannot change their minds cannot change anything.”

- George Bernard Shaw

Di Giacomo B., Marco Pio S., Edoardo U.

The Main Problems:

- Public transports pollute a lot; 
- Energy and electricity is provided by using non-renewable resources; 
- There are too many petrol cars; 
- There are too few bicycle lanes, so bikes are inefficient; 
- There are too little dumpsters so trash accumulates. 

Public Transport

- To make the bus system both economically and ecologically more efficient it would be best to start out by placing a controller on each bus.
- Then, by using the money gained, more electrical buses would be bought.
- In the end, through this process, all buses would become electrical, thus decreasing the city's overall level of pollution.

Renewable Energy

- Some incentives and bonuses for solar panels and windmills;
- In 2014, the government had guaranteed a refund of the entire cost of the renewable energy source by taking it away from taxes;
- Advertisement, as newspaper articles or TV commercial, to promote the project.

Electric/Hybrid Cars

- Diminish the taxes on hybrid or electric cars;
- Charging points should be installed at least in every major city;
- Free charging points should also come with the cars, or be given by the government, for any person who were to buy them.

Bicycles and bicycle lanes

- The size of the roads should be decreased, however, traffic would momentarily increase.
- In place of those roads bicycle lanes would be built, as well as bike sharing stations.
- The government should give incentives or reduce taxes for bike and scooter owners.

Bins and trash disposal

- More bins should be put around the city, as well as more cleaners should be employed to clean them and all the streets.
- The government should inform everyone about recycling, and those who do not should be heavily sanctioned.
- A new system should be introduced to monitor the usage of dumpsters and the disposal of waste, by utilizing a magnetic card.
