

# THE PROBLEM OF POLLUTION

By Carlotta Atieri

# INTRODUCTION

- ◆ At the beginning pollution was not a problem because there were less city with a small number of people; it became a problem when people started to create cities with a great number of people
- ◆ 3 kinds of pollution: air pollution, water pollution and land pollution.
- ◆ Negative effect on wildlife and on humane health

# ADVICE TO REDUCE POLLUCION

- ◆ **Air pollution**: take public transport , opt for a fan instead of air conditioning, buy a lowest-polluting car or a zero-emission electric car.
- ◆ **Water pollution**: use less plastic, do not dispose household chemicals or chemicals agents in the sink, recycling
- ◆ **Land pollution**: reduce toxic materials, recycle waste materials, improve fertility of the land by reforesting

# CONCLUSION

- ◆ I hope that in 2 years we all can follow this rules and give our contribute.
- ◆ I believe that if we all do this little things, the pollution will be reduced.
- ◆ The process will be long but after we and our future generation could live better than now.
